Nmap done: 1 IP address (1 host up) scanned in 637.21 seconds

Conclusion

No critical vulnerabilities were detected in the Nmap scan, but regular scans are advised to ensure ongoing security.Shodan identified 2 open ports, which could serve as potential entry points for attackers.It is recommended to review these open ports and secure or close them if they are not needed. Disabling unnecessary services can minimize exposure to threats.WHOIS lookup provided detailed information about the domain ownership. This information can be used to understand the entity behind the domain and assess potential risks associated with it.The IP is located in IN, which could indicate the origin of the services and provide insights into potential regional threats.No vulnerabilities were detected . Consider using other tools or methods, as our scan did not find any issues.
